DETAILED ACTION

Election/Restrictions

1. Applicant's election of I in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Information Disclosure Statement

2. The information disclosure statement filed 12/31/2002 has been considered and placed in the application file.

Claim Objections

3. Claims 23 and 31 are objected to because of the following informalities: "is positioned on a patient" should be "is adapted to be position on a patient". Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 15-8, 20, 21, 23, 27, 29, 30 and 31 rejected under 35 U.S.C. 102(b) as being anticipated by A.S.A.M.I. Group (Operative Principles of Ilizarov).

In regard to claims 15-18, A.S.A.M.I. Group discloses a fixation system including a plurality of circular fixation plates (Fig. 2.14) comprising at least six points, such that a first fixation plate can be rotated less than 60 degree about a central axis and the points of the first fixation plate will maintain a defined relationship with respect to the points of another fixation plate in the system. A.S.A.M.I. also disclose a full ring/plate comprises a plurality of points in a number that is a multiple of six, providing 2x3 symmetry (2, Fig. 2.1)

In regard to claim 20, wherein the points on the plates are positioned so that in use points on opposite plates move into alignment as adjustment is effected (Fig. 2.14)

In regard to claim 21, wherein the points are attachment structures (Fig. 2.14)

In regard to claim 23, wherein the system is adapted to be placed on a patient.

In regard to claim 27, wherein the at least six points are provided in number that is a multiple of three.

In regard to claims 29-31, A.S.A.M.I Group discloses a fixation system including at least two of circular fixation plates (Fig. 2.14) comprising at least six points, such that a first fixation plate can be rotated less than 60 degree about a central axis and the points of the first fixation plate will maintain a defined relationship with respect to the points of another fixation plate in the system, and a plurality of struts (a, Fig. 2.13) adapted to interconnect the plates at various positions, wherein the points facilitate

attachment of the struts and an accessory adapted to be attached to either or both of the at least two fixation plates.

Note: The introductory statement of intended use and all other functional statements have been carefully considered but are deemed not to impose any structural limitations on the claims distinguishable over the device as disclosed by A.S.A.M.I. which is capable of being used as claimed if one desires to do so.

Allowable Subject Matter

6. Claims 1-14 are allowed. Claims 22, 24-26, 28, 32-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: In regard to claim 1-14 and 22 the prior art fails to disclose or suggest the attachment structures being positioned in the system as claimed. In regard to claims 24-26, 28 and 32-34, the prior art fails to disclose or suggest the system including six struts being connected to the points as claimed.
